DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Levin et al. (US 4,471,915). Levin discloses a lid for a bowl of a food processor including:

1. a feed tube (62) extending from a top lid wall (58) along a feed axis;
2. the feed tube (62) including a continuous inner feed surface that defines a feed cavity (inside of 62);
3. a movable gate (a portion of 52) positioned within the feed cavity (inside of 62);
4. the movable gate (a portion of 52) being pivotable about a hub (56) on a swivel axis (56);
5. the movable gate (a portion of 52) pivotable within the feed cavity (inside of 62) between an open position and a compacting position (Figure 1); and
6. the swivel axis (56) being generally parallel to the feed axis.

Claim Rejections - 35 USC § 103

Art Unit: 3725

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Levin et al. (US 4,471,915) in view of Howard (US 4,397,427). The claim calls for a food pusher. In a closely related art, Howard discloses a food pusher being movable generally parallel to a feed axis within a feed tube in order to control food material (Figure 1). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to provide Levin with a food pusher being movable generally parallel to a feed axis within a feed tube in order to control food material, as taught by Howard.

Allowable Subject Matter

Claim 33 is allowed.

Claims 17-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed on January 10, 2007 have been fully considered but they are not persuasive. Applicant presents one major argument with regard to claim

Art Unit: 3725

rejections of claims 16 and 34. It is noted that claims 16 and 34 are the only rejected claims.

Applicant argues that Levin's movable gate (62) is always positioned outside of a feed cavity. This is not persuasive. It is noted that the claim rejection is based on Levin's movable gate (a portion of 52) as described in the last Office action. The last Office action does not rely on Levin's element (62) as a movable gate. Therefore, Applicant's argument is moot. Levin, in fact, discloses a movable gate (a portion of 52) positioned within the feed cavity (inside of 62).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
